### 11 TOXOLOGICAL INFORMATION

#### HEALTH EFFECTS

**Inhaled:** Inhalation of vapours may cause drowsiness and dizziness. This may be accompanied by sleepiness, reduces alertness, loss of reflexes, lack of co-ordination and vertigo.  
Inhalation of vapor's or aerosols (mists, fumes), generated by the material during course of normal handling, may be damaging to the health of the individual.  
There is some evidence to suggest that the material can cause respiratory irritation in some persons.

**Ingestion:** Accidental ingestion of the material may be damaging to the health of the individual. Ethanol is a denaturant, which may cause optical nerve damage if ingested. May produce nausea, vomiting, bleeding from the digestive tract, abdominal pain and diarrhea.

**Skin contact:** There is some evidence to suggest that the material may cause moderate inflammation of the skin following direct contact or after a delay of some time. Repeated exposure can cause contact dermatitis which is characterized by redness, swelling and blistering.  
Application of Deet to the skin produces no primary irritation or sensitization in humans. In rabbits, redness and peeling of the skin have been observed as well as intoxication, excitation, stiffness and loss of co-ordination.

**Eye** There is some evidence that material may produce eye irritation in some persons and produce eye damage 24 hours or more after installation. Severe inflammation may be expected with pain.

### 12 ECOLOGICAL INFORMATION

**Eco Toxicity:** Soil: N,N-diethyl-m-toulamide (DEET), an active ingredient in insect repellent, is found to be moderately mobile in soil and is stable to hydrolysis at soil pH level typically found in the environment. Studies show that DEET can be biodegraded by soil microorganisms e.g. *P. putida*.  
Water: DEET, practically insoluble in water, was detected in water as a result of urban wastewater contamination to stream flow.

**Persistence  
And degradability:**

Ingredient	Persistence: Water/Soil	Persistence: Air
Ethanol	LOW (Half-life= 2.17 days)	LOW (Half-life= 5.08 days)
N,N-diethyl-m-toluamide	HIGH	HIGH
Water	LOW	LOW

Ingredient	Bioaccumulation potential	Mobility in soil
Ethanol	LOW (LogKOW=-0.31)	HIGH (KOC= 1)
N,N-diethyl-m-toluamide	LOW (BCF- 2.4)	LOW (KOC= 536.6)
Water	LOW (LogKOW=-1.38)	LOW (KOC= 14.3)

**Cautions:** See Section 13

### 13 DISPOSAL CONSIDERATIONS

**Disposal Method:** **P501:** Refer to State/Territory Land Waste Management Authority. Dispose of material by a licensed waste contractor. Rinse empty containers thoroughly before recycling or disposing to an authorized landfill. Materials should be recovered for reuse if possible. Suitable for incineration by an approved agent.
